

Introducing the Samsung Notebook Flash

Notebook Flash is the ultra-light, all-in-one laptop that's designed to be distinct inside and out. It features a 13.3" FHD display, a retro-style ergonomic keyboard and a built-in fingerprint sensor. Gigabit Wi-Fi connectivity and Universal Flash Storage let you stream, download and transfer videos in a flash

Ultra Slim Design

Stylish. Slim. Stunning.

A retro keyboard and 13.3" display combined with a modern, ultra-light build create a signature style that can go wherever you go.

GIGABIT WI-FI CONNECTIVITY

Stream. Download. Done.

Offering gigabit network speeds means you can stream videos and music, or work online without interruptions. Get tasks done quickly and seamlessly no matter where you are.

FAST UNIVERSAL FLASH STORAGE

Universal Flash Storage, the latest innovation in flash memory technology, performs up to five times faster than traditional microSD storage – enabling rapid file saving and transfers. The device's multi-purpose slot lets you use either a UFS or a standard microSD card*.

WINDOWS 10

Do it all.

Windows 10 and the latest Intel® quad-core processor give you the power and flexibility to juggle all your tabs and apps seamlessly

VERSATILE PORTS

There's a port for that.

Charge devices, connect to monitors, and transfer files quickly. In addition to removable storage, Notebook Flash has USB Type-A, USB Type-C and HDMI ports to conveniently work with a wide selection of hardware.

Operating System

OS: Windows 10 Home

Processor

Processor / Chipset: Intel® Pentium Silver Processor N5000 (1.10 GHz up to 2.70 GHz 4 MB L2 Cache)
